Duty Officer/Responder Name: Tabayoyong	NRC Report #: 945272	Hotline Log DataID: 793666
Action Information		
<p>Description: OSC Tabayoyong contact ConEdison to investigate the status of the clean up. She spoke with Anthony Buda, who informed her that a the drive of a flat bed truck released approximately 1 gallon of oil throughout the yard since he was unaware of the leak. The gas production group will be conducting the clean of this area. In addition, a sheen was identified in one of their storm drains. Currently he was unsure if this material was released from the storm drain to one of their outfalls. An individual on their emergency response team will further investigate. Mr. Buda will contact OSC Tabayoyong with this update.</p> <p>At 10:47, Mr. Buda contact EPA with an update. The leve of water in the storm drain was well below the pipe that leads to the outfall. They are curently cleaning up the storm drain and placed a ballon in the outfall pipe. The is a temporary measure in anticipation of a rain event, until the clean of the storm drain is complete.</p>
